 "To enhance people's enjoyment of Buck Lake now and for future generations"

Provided below is a belated Election Survey response composed today by Larry York to replace a response he sent previously but which was not received by BLA and apparently could not be found on Larry's computer to be resent.

Dear Roy,
 I went to the boat launch at Buck Lake and can appreciate the problem The ramp has had some repairs but need an extension on the water end about nine feet long to make loading easier. the parking is not so easy to address as there seems to no available land around to be purchased for more cars etc. The waterfront property has increased in value and will continue to increase so the owner will have to sell or bite the bullet There is only so many lots on any given Lake (I sold mine)and am enjoying the money. It is critical That all municipal properties must maintain and protect every watershed. South Frontenac has all of these things spelled out in the official plan. Amalgamation is something to strive for instead of districts. since we did not all start at square 1 it will take continued effort time and patience.

I am short forming a response I made to you before as I need to be knocking on doors
 In The Faith
 Larry York
